Tax plan proposed in House would cut mortgage interest deduction. H.R. 1, introduced on November 2, would retain the Low Income Housing Tax Credit, eliminate private activity bonds and the 4% credit, end the New Market Tax Credit Program, and reduce the mortgage interest deduction. Homeowners would be able to deduct interest payments made on up to $500,000 in home loans, rather than the current $1 million. The funds generated by this change would be used to cover the cost of lowering other taxes. The House Ways and Means Committee will consider the bill on November 6.
